

Product Specification Data

maxmetal™

Description

MAXMETAL is an aluminum composite material comprised of two, pre-painted .15mm aluminum panels bonded to a solid polyethylene core. It's lighter in weight and more durable than both MDO and aluminum, plus it resists scratching and denting better than wood panels. The finish is ready for vinyl, screen print inks, paint, cutting, or routing.

Product Properties

Weight (Kg/m ²)	3.55
Sound Absorption NRC	0.05
Sound Attenuation Rw db	24
Water Absorption % by volume	0.01
Thermal Performance R Values	0.0057
Core Composition	Polyethylene
Flammability BS476	Part 6: Class 0, Part 7: Class 1

Panel Dimensions

Panel Thickness (mm)	3
Aluminum Thickness (mm)	0.15
Standard Sizes:	4' x 8', 4' x 10', 5' x 10'

Product Code

MM843MW
MM843MW1S

Dimensional Tolerances

Thickness (mm)	-0 + 0.2
Width (mm)	±2
Length (mm)	±3
Diagonal (mm)	±5
Thermal Expansion	2.4mm/m @ 100°C Temp Difference
Aluminum Thickness (mm)	±0.02

Surface Properties

Paint Thickness (micron)	20
Pencil Hardness	>HB
Toughness of Coating	3T
Temperature Resistance	-50°C to +90°C
Impact Strength (kg cm ²)	42
Boiling Water Resistance	Boiling for 2 hours without change
Acid Resistance	Immersed surface in 2% HCl for 24hrs without change
Alkali Resistance	Immersed surface in 2% NaOH for 24hrs without change
Oil Resistance	Immersed surface in 20# engine oil for 24hrs without change
Solvent Resistance	Cleaned 100 times with Dimethylbenzene without change
Cleaning Resistance	>1000 times without change
Peel Strength	>5 Newton/mm

Statement of Practical Use

We believe the information on this product to be accurate. However, since we cannot anticipate or control the conditions under which this information or our products may be used, we cannot guarantee results obtained through their use. Tests of our products should be made by users to determine the suitability of these products for a specific purpose. The products are sold without warranty, either express or implied. The purchaser should refer to Grimco, Inc's price list for terms and conditions of sale, including disclaimer of warranties and limitation of liability.

The ultimate Aluminum Composite Material (ACM) for the display & signage markets

DIBOND | Superior Surface, Superior Performance

- Comprised of two pre-painted sheets of .012" aluminum with a solid polyethylene core
- Premium, smooth surface is ideal for digital & screen printing as well as mounting
- Can be digitally printed on both sides
- Provides excellent durability in outdoor applications
- Superior surface protects expensive digital and screen-printed graphics
- Can be routed and returned to add dimension, or roll-formed to create dramatic curves
- Brushed metal and mirror finishes provide a high quality aesthetic for interior design applications
- A range of high gloss & matte color options
- Flattest panel on the market - won't bow or oil can
- Approximately 1/2 the weight of a solid aluminum sheet
- Self extinguishing; Class A fire rating (ASTM E-84)
- UL 879 certified for electric sign components

DIBOND BUTLERFINISH Brushed Metals | Quality Meets Design

- Specialized manufacturing process creates an embossed, brushed aesthetic
- High-quality brushed effect is ideal for store design, furniture construction, high-end store displays and signage applications
- Extremely unique results when direct digital or screen printed
- Provides the same product & processing capabilities of standard DIBOND

NEW! DIBOND Specialty Mirror Finishes | A Reflection of Quality

- Specialized manufacturing process creates a clear, reflective mirror surface
- High-quality finish is perfect for store design, high-end retail displays and signage applications
- Mirror surface doesn't flake off during cutting or fabrication
- Light weight & durable - won't break during transportation or installation
- Less sensitive to pressure than acrylic or glass - no warping
- Approximately 1/2 the weight of a conventional glass mirror

E-PANEL | ACM For Flat Panel Applications

- Comprised of two pre-painted sheets of .008" aluminum with a solid polyethylene core
- Recommended for flat panel applications
- Suitable to mount graphics
- Suitable for digital & screen printing
- Digitally printable on both sides
- Can be saw cut, routed or punched

EPL-5 | ACM For Flat Panel Applications

- Comprised of two pre-painted sheets of .005" aluminum with a solid polyethylene core
- Recommended for flat panel applications
- Suitable to mount graphics
- Suitable for printing
- Digitally printable on both side
- Can be saw cut, routed or punched
